

Land Use and Transport

European Perspectives on Integrated Policies

Stephen Marshall

David Banister

About the Book

This is a text/reference, written in a style accessible to non-specialists as well as academic researchers. It shows the inter-relationships between transport and land use planning, emphasising the nature of their integration, and showing benefits of integration. It demonstrates research findings and draws conclusions for application to policy and practice. It is coherent and comprehensive and is based on a major set of recently completed European research projects (PLUME). It focuses on the relationships between transport and land use planning. It addresses general topics and specialist topics before providing a synthesis to the discussion. The information is gathered from the PLUME project.

LAND USE AND TRANSPORT

EUROPEAN RESEARCH TOWARDS
INTEGRATED POLICIES

EDITED BY STEPHEN MARSHALL AND DAVID BANISTER
