

Cross-cultural Analysis of Organizations

Research in the Sociology of Organizations

Samuel B. Bacharach

Samuel B. Bacharach

Miriam Erez

Peter A. Bamberger

About the Book

This series considers theoretical, methodological and research issues relevant to organizational sociology. It is specifically concerned with trying to specify the unique contributions of broad sociological theories and research techniques to the analysis of organizations. Both micro and macro sociological approaches are emphasized. From a micro perspective an effort is made to bring to the forefront such perspectives as phenomenology, ethnomethodology and symbolic interaction. The macro analysis also places an emphasis on the institutional, historical and cultural examination of organizations. An effort is made to use this series as a forum for the presentation of theories and research which challenge conventional views of organizational sociology. This volume presents an examination of organizations which is cross-cultural, covering all areas of cultural diversity and spanning countries, generations and identities.
