

Normative Social Action

Comparative Social Research

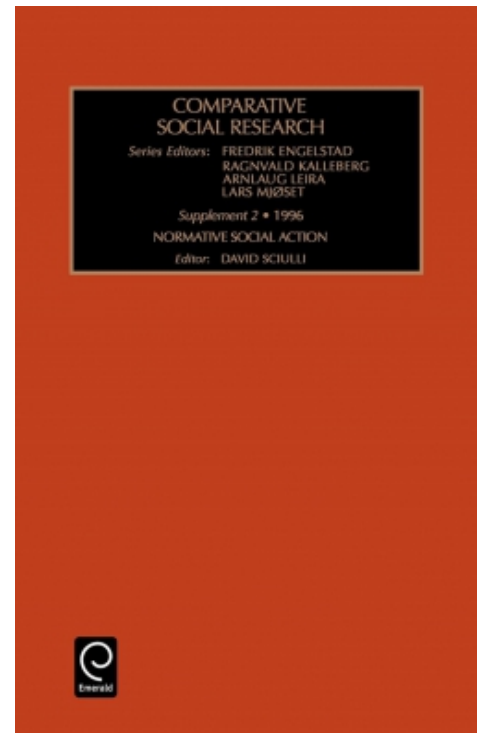

David Sciulli

Fredrik Engelstad

Ragnvald Kalleberg

About the Book

Focusing particularly upon normative social action, this text is divided into five sections, each with a theme. The first section deals with collective memory with a study of German collective memory. This central theme is explored through examinations of other aspects of society: cultural studies; the university and intellectuals; regional studies and family life. The section on regional studies contains essays on ethnic conflict in Italy and environmental issues in the Basque country.
