Studies in Symbolic Interaction

Norman K. Denzin

## About the Book

The essays in this annual series consist of original research and theory within the general sociological perspective known as Symbolic Interactionism. International in scope, this series draws upon the work of interpretive students of cultural studies, ethnographers, phenomenologists, ethnomethodologists, critical, standpoint and feminist theorists, as well as traditional symbolic interactionists. The emphasis is on new thought and research which bridge links to an emergent critical theory of self, language, the media, socialization, interaction, social relationships, and race, class, and gender.
