

Employee Participation, Firm Performance and Survival

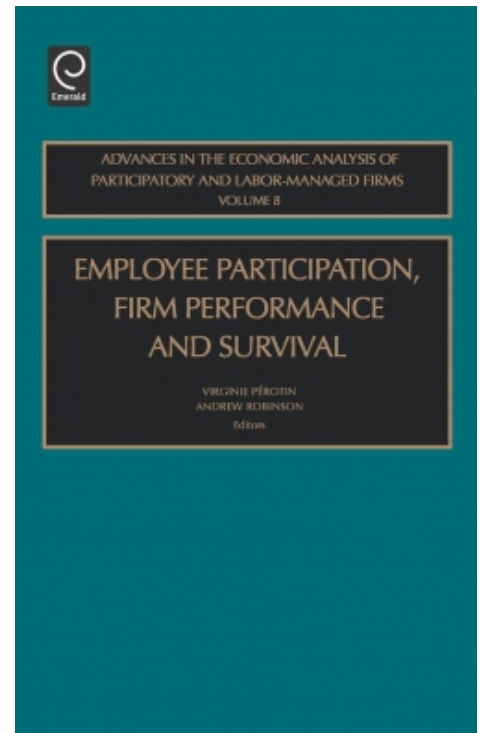

Advances in the Economic Analysis of Participatory & Labor-Managed Firms

Virginie Perotin

Andrew Robinson

About the Book

This latest volume of "Advances" contains a series of original and innovative empirical and survey papers that investigate theoretical and contemporary issues facing participatory organizations. The first four papers explore the growing area of participatory and labor-managed firms' survival. The second group of three papers offers a number of new approaches and insights into the performance effects of participatory firms, and the final group of papers provides a broad-ranging synthesis and assessment of the experience of employee ownership and participation in transition economies. Collectively, these nine papers truly constitute "Advances in the Economic Analysis of Participatory and Labor-Managed Firms".
