

Multi-Level Issues in Organizations and Time

Research in Multi Level Issues

Fred Dansereau

Francis J. Yammarino

About the Book

"Multi-Level Issues in Organizations and Time" is Volume 6 of "Research in Multi-Level Issues", an annual series that provides an outlet for the discussion of multi-level problems and solutions across a variety of fields of study. Using a scientific debate format of a key scholarly essay followed by two commentaries and a rebuttal, we present, in this series, theoretical work, significant empirical studies, methodological developments, analytical techniques, and philosophical treatments to advance the field of multi-level studies, regardless of disciplinary perspective. Similar to Volumes 1 through 5, this volume contains five major essays with commentaries and rebuttals that cover a range of topics, but in the realms of organization and time. In particular, the five critical essays offer extensive literature reviews, new model developments, methodological advancements, and data for the study of distributed teams, team mental models, dimensions of time, timescapes, and justice climate. While each of the major essays, and associated commentaries and rebuttals, is unique in orientation, they show a common bond in raising and addressing multi-level issues or discussing problems and solutions that involve multiple levels of analysis in organizations and time. This title provides in-depth scholarly information on multiple level issues in organizations and time and is international in scope.
