

Environmental Philosophy

The Art of Life in a World of Limits

Advances in Sustainability and Environmental Justice

Liam Leonard

John Barry

Marius De Geus

About the Book

Humankind has long considered the relationship it holds with nature to be both a blessing and a challenge. The onset of climate change has brought a new impetus to this relationship. This volume of Advances in Sustainability and Environmental Justice will examine environmental philosophy from a number of viewpoints. Each contributor has a unique perspective on the interaction and engagement between humanity and the rest of nature, from the technological to the philosophical. Environmental Philosophy: the Art of Life in a World of Limits provides a series of interesting studies on humanity's place in the world, and the impact this is having on the planet. The book poses the question as to whether life can be lived in harmony with nature, and what limits can be achieved in the impact such life has on the world around us.
