

Advances in Management Accounting

Advances in Management Accounting

Mary A. Malina

About the Book

This volume is a publication of quality applied research in management accounting. The volume's purpose is to publish thought-provoking articles that advance knowledge in the management accounting discipline and are of interest to both academics and practitioners. The book seeks thoughtful, well-developed articles on a variety of current topics in management accounting, broadly defined. All research methods including survey research, field tests, corporate case studies, experiments, meta-analyses, and modeling are welcome. Some speculative articles, research notes, critiques, and survey pieces will be included where appropriate. Articles may range from purely empirical to purely theoretical, from practice-based applications to speculation on the development of new techniques and frameworks. Empirical articles must present sound research designs and well-explained execution. Theoretical arguments must present reasonable assumptions and logical development of ideas. All articles should include well-defined problems, concise presentations, and succinct conclusions that follow logically from the data. This volume intends to provide authors with timely reviews clearly indicating the acceptance status of the manuscript. The results of initial reviews normally will be reported to authors within eight weeks from the date the manuscript is received. The author will be expected to work with the Editor, who will act as a liaison between the author and the reviewers to resolve areas of concern. To ensure publication, it is the author's responsibility to make necessary revisions in a timely and satisfactory manner.
