

Collaborative Risk Mitigation Through Construction Planning and Scheduling

Risk Doesn't have to be a Four Letter Word

Lana Kay Coble Ed.D. CPC

About the Book

In the complex, cash-strapped, high pressure world of modern construction, what do you do when something goes wrong? This work looks beyond the best-case scenario to give project managers, contractors, architects and engineers the tools to prepare effectively for the unexpected.

Based on the author's more than thirty-five years of construction management experience, the book shows how to proactively mitigate a schedule. It opens with case studies of real life construction mitigation, and goes on to examine the conceptual aspects of anticipating risks and making contingency plans, technical aspects of scheduling, and essential role of communication in change management.

Working on the principle that no major project can ever quite go to plan and that "it's not how you start, it's how you finish," *Collaborative Risk Mitigation* is the ideal complement to traditional scheduling textbooks.
