About the Book

Asia-Pacific Contemporary Finance and Development collects a well-informed range of fourteen chapters, investigating banking, finance, production, and consumer sectors that are vital shares of modern economies and definitive drivers of growth in the Asia-Pacific economies. The chapters, authored by internationally renowned and experienced academics, showcase the most updated economic and entrepreneurial dynamism in the Asia-Pacific, a large and thriving region that is recognized as a driving force of innovation and economic growth worldwide.

From the TPP and the U.S., to short-term cross-currency basis swap and Japanese government bond markets, and from volatility and risk-taking firms and corporate diversification strategy and the political effects of the Corporate Social Responsibility, to consumption propensity and entrepreneurship, this volume of *The International Symposia in Economic Theory and Econometrics* explores and investigates contemporary challenges and issues facing the Asia-Pacific economies. For researchers and students of economics and finance, this volume is a fascinating exploration of emerging topics in one the fastest growing economies in the world.
