

Designing Effective Library Learning Spaces in Higher Education

Innovations in Higher Education Teaching and Learning

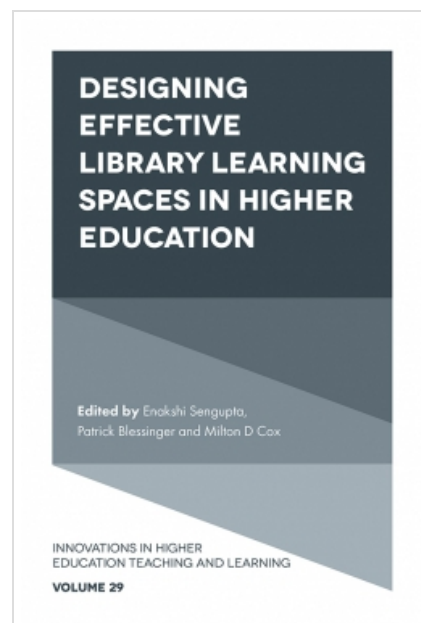

Enakshi Sengupta

Patrick Blessinger

Milton D. Cox

About the Book

Modern academic libraries must respond not only to pedagogical changes, but to technological changes. Accommodating advances in technology into library space, design, and management is a critical challenge. How can modern libraries successfully integrate traditional learning forms with digital ones? This book presents case studies and empirical evidence which focus on the current landscape and future potential posed by the changing face of libraries. Readers are invited to learn how the re-modelling and new architectural design of existing libraries can revitalise the library space and inculcate digital literacy development within their walls. The authors offer an engaging account of how libraries' meet users' needs and utilize stakeholder inputs to design truly innovative library spaces.
