

## Armed Forces and Conflict Resolution

### Sociological Perspectives

Contributions to Conflict Management, Peace Economics and Development

Giuseppe Caforio

Gerhard Kummel

Bandana Purkayastha

### About the Book

The study of armed forces and conflict resolution has undergone important developments at the turn of the millennium, driven by emerging events. The fall of the Berlin Wall, the end of the Cold War, the resurgence of nationalism and religious wars, ethnic cleansing, September Eleven, the War on Terror, and asymmetric warfare, the United Nations' inability to manage and successfully conclude military operations, are so many flash points of how much things have changed since the Cold War. The action of militaries has become more important, more difficult, more controversial, and, at the same time, insufficient, without parallel methods and political actions for resolving conflicts. As scholars' conceptions of conflicts have changed, so have their understanding of conflict resolution and peace. This latter scholarship now spans analyses of the role of governments, civil institutions, and organized groups. The studies of building and sustaining peace now span institutional, inter-actional, and interpersonal levels in order to conceptualize a more holistic, long-term vision of peace. This book brings together contributions from scholars of various social science disciplines on three themes that appeared significant for the study of the phenomenon of conflict and conflict resolution. The first theme is centered on the new aspects of war in the twenty-first century where asymmetric warfare has changed many rules of the game, imposing a profound transformation on the military, not only tactical, but also structural, preparatory, mental and ideological. The second theme regards the delicate relations between the armed forces and societies. The ever-greater technicality of military operations and their lower comprehensibility to the broad public as a result, together with increased sensitivity in many countries in regard to the use of violence and death, have created social situations and problems that deserve to be investigated. The third theme, building and sustaining peace, operationalizes different types and levels of violence and conflict. It assesses ongoing efforts, for instance, governments trying to contain
